---

### OBJECTIVE

Seeking for Frontend Web Designer position at 123RF Technology that will utilize my technical skills and experiences.

### EDUCATION

#### **BS Software Engineering - Iowa State University**

*August 2013 - December 2016*

- CGPA : 3.56 / 4.00
- College of Science and Engineering Dean's List Award
  - Fall 2013, Spring 2014, Fall 2015, Spring 2016

### EXPERIENCES

#### **Web Developer at Westports Malaysia Sdn Bhd**

*February 2017 - Present*

Developed and maintained various internal web application for the port operation such as Yard Planning and Container Planning application. The web application mainly developed using plain PHP and Wordpress framework. Besides, I also involved in project to integrate existing application with new Terminal Operation System which is mainly build on Oracle database.

#### **Co-Founder / Web Developer at InnovaSeeds Solutions (Startup)**

*May 2016 - Present*

Built a web application with React, Redux, GraphQL and NodeJS called Seeds Job Fair. The application is a virtual career fair platform where students can meet and have video call session with recruiters from various hiring company.

- **Project website** : [seedsjobfair.com](https://seedsjobfair.com)

Built a web application using AngularJS and NodeJS called DropBug. This application is a platform to facilitate small and medium enterprises (SME) in handling inventory and transaction efficiently. It also serve as a platform to gather the community of people who are involved in SME.

- **Project website** : [dropbug-seeds.com](https://dropbug-seeds.com)

#### **Webmaster at International Student Council**

*Iowa State University — August 2016 - Present*

Maintaining and upgrading the organization's official website as well as helping promotional work together with Public Relation Committee.

- **Official website**: [isc.stuorg.iastate.edu](https://isc.stuorg.iastate.edu)

## **Undergraduate Programmer at Schnable Laboratory at the Plant Sciences Institute**

*Iowa State University — Jan 2016 - August 2016*

Designed an Automated Imaging System to facilitate the research of plant growth at the laboratory. This system consist of up to hundreds Raspberry Pi and each of them have four camera running on it. The whole system is managed by a single Raspberry Pi that act as the main server which store images and data transferred from other Raspberry Pi. In Summer 2016, I went to crop fields in Kansas and Nebraska to deploy the system and stay for a week to make sure it works as intended.

## **Webmaster for Senior Design Project**

*Iowa State University — August 2015 - May 2016*

Our senior design project is trying to solve a problem due to the tools used in the ECPE machine shop often get missing. We created a system called Automated Tool Monitoring System which make used of Raspberry Pi, NI myRIO, and webcam to secure and track down the tools borrowed by students.

## **Multimedia and Technical Leader at Malay Heritage Club**

*Iowa State University — August 2015 - May 2016*

Developed and maintained club's official website as well as created posters and videos to promote the club's events

- Official website: [mahec-isu.wixsite.com/mahec-isu](http://mahec-isu.wixsite.com/mahec-isu)

## **Promotion Director for Temasya Jaguh Malaysia 2015**

*Iowa State University — March 2015*

Temasya Jaguh Malaysia is an annual sport carnival held by Malaysian students studying in the United States to bring the Malaysian community around the Midwest region together through love of sports. As the Promotion Director, I lead a team of five to create promotional materials for the event including website, posters, and videos. The Temasya Jaguh Malaysia 2015 had recorded the highest number of participants ever since its first establishment.
